

DECLARATION

Department of Water Resources' Preliminary Engineering Analysis

On cross-examination in the WaterFix Hearing, the Engineering panel stated that the proposed tunnel diversion would not leak. However, that statement is in contradiction to statements in a 2010 preliminary engineering analysis, entitled, *Draft Report Of the Initial Analysis & Optimization of the Pipeline/Tunnel Option*, which I obtained from the Department of Water Resources' ftp server in 2012 via a Google search. I have submitted a copy as Exhibit DDJ-141.¹ I provided a copy to Dr. Tom Williams to evaluate and compare with the Final Draft Conceptual Engineering Report, which was submitted for the Hearing.

Executed on this 23rd day of March, 2017 in Santa Cruz, California.

Deirdre Des Jardins

¹ Exhibit DDJ-141, California Department of Water Resources, *Draft Report Of the Initial Analysis & Optimization of the Pipeline/Tunnel Option*, December 17, 2010. Obtained from DWR's ftp site in 2012 via Google search. Exhibit DDJ-141 is a true and correct copy of the document.
